**Crystal glass**

Crystal glass differs from conventional glass by its particularly high transparency and brilliance. Depending on the cut, light rays are refracted thousands of times in the glass, so that crystal glass shimmers and sparkles beautifully. With their appealing appearance and fine mouth rim, stemware made of crystal glass is also perfect for tasting.

**Outdoor bar series Baruba**

Stylish outdoor bar made from a material mix of powder-coated aluminum, textile covering and rope wickerwork. The insert panel made from compact laminate with HPL decorative surface further enhances the product.

The Baruba bar is a flexible outdoor bar concept, designed for use at events or as an additional bar for outdoor areas. It is ready for use in just three steps: Open the side wings, insert the HPL countertop — done. The Baruba bar can be extended as desired, the two parts are quickly and easily attached via a plugin connection. The system can also be extended with an inner and outer corner. With the outer corner, only insert plates are required, so there is no need for an additional frame. Guests will be amazed, and want to linger and enjoy the bar. The bar is folded together to save space and is stowed in practical carrying cases for transporting to the venue and storing. Suitable for outdoor use. Delivered part assembled.

FURNITURE

PULSIVA

**Outdoor furniture series Resistance**

Simple outdoor furniture series made of lightweight aluminum with gray powder coating and plastic panels in teak look. UV and weather resistant. The plastic strips used in teak look are easy to clean. The furniture series consists of: Bench, chair with or without armrests, small and large dining table, bar table and bar stool. Suitable for outdoor use.

Note: The outdoor tables with plastic tops in wood look have many advantages over tables with wooden table tops. However, there are some points to consider when using these tables: Glasses or other objects made of glass, such as ashtrays or vases, can cause a burning glass effect (magnifying glass effect) when exposed to direct sunlight, which can cause damage to the surface.
